

STEWARDSHIP POLICY

Pukekohe Growers Supplies Ltd endeavours to work within the community and it's customers by:

Providing the best technical approach by employing specialised agronomists and offering continual training to maintain a high standard of knowledge in their roles

Encourage 'prescription growing' for each customer by adopting specific personal programmes that protect their crops and surrounding neighbours without harming the environment

Promoting the use of an electronic spray diary programme which will ensure only registered products are used on crops and at the correct rates. The encouragement and application of un registered products will be reported to the ACVM.

Remaining flexible and adapting to ever changing environmental needs

Promoting IPM and the use of registered agrichemicals and fertiliser on all crops

Continually working to monitor and improve our current Health & Safety System and Site Management Plan

Commit to comply with legislation and compliance rules and requirements

Work with our customers to enhance their own 'best practices' of production, packaging, and distribution incorporating a system that reduces the risk of H&S and environmental issues.

Continue to offer our customers updates in the education of growing technology in the form of field days, conferences and grower meetings

Pukekohe Growers Supplies Ltd commits to evaluate ourselves and improve continuously as our operation grows

Mike Gordon – Business Manager
